# Otolift Jade Stairlift

A clever mix of design  
and ergonomics

# The Otolift Jade

**The latest stairlift by Otto Ooms, the Otolift Jade, has been specially developed for straight stairways. The Jade is distinguished by its impressive design, with an ultra-slim aluminium track and equally compact lift chair. High-quality, durable materials are incorporated in the design, giving the chairlift a stylish look. The subtle design allows the stairlift to blend seamlessly with your interior.**

The slim shape ensures that the stairs remain optimally accessible to the other members of the household. The Jade was designed in close co-operation with a renowned Dutch industrial design bureau. The end result is a typical piece of Dutch design: a perfect combination of astute ergonomics, user-friendliness and neatness of style. The Jade chairlift meets all the requirements as regards safety, comfort and reliability. Safety provisions ensure a stable, quiet ride quality. The comfortable seat and back support allow you to travel pleasantly and easily between floors. After use, the lift chair can be folded away, taking up very little space. Other stair users can pass freely.

The Jade Otolift  
gives you renewed  
freedom

Discovering that you can no longer do certain things that you used to do without thinking is concerning. You have to learn to cope with your limitations and accept that you can no longer do everything under your own steam. You have to think of possibilities and solutions. With the Jade Chairlift from Otolift, you will be able to continue living in your familiar surroundings and recover part of your lost freedom and independence.

## UNIQUE TRACK SYSTEM

The Jade's super-smooth aluminium track speaks of its high quality and the craftsmanship of the designers. This unique aluminium track ensures a stable, quiet ride quality. The system not only looks good, it also guarantees 100% stability. The Jade thus provides the user with pleasant and stable transport between floors, with no rocking or vibration. Thanks to the clever, functional design of the track system, the gearing of the chairlift is uncomplicated, ensuring that the Jade stairlift is practically proof against breakdown. Moreover, the lift is grease-free, and wear-resistant.

## SAFE AND RELIABLE

Safety, comfort and reliability are the foremost aspects of the design. The comfortable seat and back support ensure that you feel secure and relaxed. The Jade comes supplied with a number of safety provisions, such as a safety belt. If, during operation, the lift feels the slightest resistance, it will immediately stop. And on arriving at its destination, you can simply give the chair a quarter turn, thus closing the stair off completely and allowing you to step off safely and easily.

## EASY TO OPERATE

The Jade is simplicity itself to operate. It has, as standard, wireless remote control for summoning and sending the lift. You set it in motion using the yellow operating ball on top of the armrest. The unique ball shape enables anyone to operate the lift easily and without effort. A 'soft' start and stop contributes to the comfort of the ride – the lift starts and stops shock-free. Thanks to a continuous transmission between the various speeds, the ride quality up and down is smooth. Once you have stepped off, the chair can be easily folded away.

↑ The aluminium track is very stylish.

↑ Thanks to the clever design, the stair remains freely accessible.

↑ The mechanism is concealed subtly and compactly.

↑ *Maximum freedom of movement and optimum safety are foremost aspects of the design. You set the stairlift in motion using the yellow operating ball on top of the armrest. Stepping off at the top of the stairs is made safe by simply giving the seat a quarter turn.*

↑ *The Jade stairlift is distinguished by its compact, stylish design. The mechanism is cleverly concealed within the very slim seat. Thanks to the subtle, timeless design, the stairlift fits in perfectly with your interior. The stair remains freely accessible to visitors and other members of the household.*

## **RELIABLE IN A POWER CUT**

The Jade chairlift is powered by two batteries that are automatically charged when the lift is parked on its usual spot. The charging is done automatically via the two charging stations positioned on the track. You are not dependent on the electricity supply. In the event of a power cut, the stairlift will function undisturbed. You need never fear that you will get stuck halfway – you will still be able to go up or down several times if the electricity supply is disrupted for whatever reason.

## **SIMPLE TO INSTALL**

Installation is fast and simple. The stylish, neat aluminium track is mounted on the stair with discrete supports, without the need for drilling into the wall.

# The Jade Stairlift – strong in simplicity and comfort

## TEN BENEFITS OF THE JADE STAIRLIFT:

- subtle, neat design
- safe and comfortable
- the stair remains optimally accessible
- uncomplicated transmission
- simple operation
- reliable in a power cut
- quiet in use
- 'soft' start and stop
- wireless remote control
- fast and simple assembly

## EIGHT CHAIR COVERINGS

You have a choice of eight different colours and two types of upholstery for the lift chair. The paintwork on the chair is cream-white.
